

## About BIMspector Lite

Enhance your BIM content analysis of your own Revit libraries with the help of our free Python enabled custom visual Microsoft Power BI toolset for BIM Managers.

Analyze gaps and gain other valuable insights across three highly customized Power BI dashboards.

Don't know Python? Don't worry. Our free toolkit includes several supporting documents to get you up and running quickly.

## Features

- Power BI template (.pbix) with over a dozen customized visuals.
- Quick Start guide and package requirements.
- Jupyter Notebooks with base code (.ipynb).
- Anonymized sample datasets.
- Image examples of plots.

## Advantages

- Uncover opportunities for improvements to your BIM library.
- Explore a broader range of custom visuals.
- Display completely different Python visuals with just a click.
- Ability to plug and play with your own BIM data!

## How it works

- 1 Visit [thebimspector.com](http://thebimspector.com)
- 2 Register download with email address
- 3 Download and run the installer
- 4 Start inspecting your content!
